## CHAIR SCALE KERN MCC - 250 KGS

Ref. EKMCC01

### Ergonomic scale chair

### Description

- Mobile version with locking brakes on all wheels
- With its four wheels, this chair scale provides maximum mobility in bringing the scale to the patient. This ensures more efficient use of time for the clinic staff and greater safety for the patients, who can be weighed in their familiar environment.
- This chair scale is the ideal measuring instrument for retirement homes, rehabilitation centers and clinics with lots of patients, and can handle weighing overweight persons weighing up to 250 kg
- For fragile and weak patients, the comfortable chair design offers safe, secure seating during weighing
- Foldable armrests and footrests make transfers into the chair easier. Ideal for overweight patients or barrier-free use, e. g. for transfers from a bed to the scale
- Ergonomically positioned carrying handles
- Automatic Data hold function: When the weighing value remains unchanged the weight indicated on the display is automatically «frozen» for 10 sec. This means that you have sufficient time to attend to the patient first and then take the weight reading in peace
- BMI function to determine normal weight / surplus weight
- High resolution readout: Read-out [d] for 5 sec increased by one decimal place at the touch of a key
- Practical mains adapter pouch to store the mains adapter which is supplied as standard. Fitting option using two Velcro fasteners.
- Large backlit LCD display, digit height 25 mm
- Optional class III verification
- Approval for medical use according to 93/42/EEC
