HEATING BLANKET

Ref. CB48-11+BCB48

The patient warming system for perioperative care

Description

Because studies have shown that intraoperative hypothermia can lead to complications for patients. GSH offers you ECM brand warming blankets, which are active patient warming systems perfectly suited to the various perioperative phases.

Eco-responsible

Adapted technology: circuit integrated into a cartridge, no pulsed air, thus preventing the presence of particles in the operating environment.

Inertia when the power is cut off, keeping the patient warm for a few more minutes.

Reusable: reduces consumable waste and is more economical.

Ease of use

Reusable

Several sizes to suit every patient

Select the temperature from 30 to 40° using the control knob on the unit and switch on the unit.

Covered with a PU cover for easy cleaning

In complete safety

Fitted with 8 independent temperature sensors for precise operation and maximum safety

with visual and audible alarms

Low-voltage power supply to prevent interference with monitors

Made in France

We have been designing and manufacturing patient warming systems for hospitals since 1991, at our factory in Saint

HEATING BLANKET

Ref. CB48-11+BCB48

Léonard de Noblat (Limoges).

Available in 3 sizes:

-half-body/paediatric (Ref : CB48-2+BCB48)

-upper body (Ref: CB48-3+BCB48)

-full body (ref :CB48-11+BCB48)
